

## **EuroWindoor feedback to the Call for Evidence on new product priorities for the ESPR**

EuroWindoor welcomes the Commission's recent proposal on new product priorities under the Ecodesign for Sustainable Products Regulation (ESPR) and appreciates the opportunity to provide input to which categories of new products and measures to address first and to promote that the EU Commission can set priorities transparently and inclusively.

EuroWindoor general position is outlined here (Call for Evidence) and specific input is given in the questionnaire of the Public Consultation which is open in parallel.

EuroWindoor supports the overall effort to ensure fair and equal conditions for products placed on the European market. This includes a harmonised way to assess, declare, market and verify environmental sustainability and circularity parameters. EuroWindoor strongly supports applying the approach used in EN 15804 as the baseline for construction products.

**EuroWindoor would like to underline the importance of having requirements on intermediary products such as aluminium, plastic, glass etc. to accelerate data availability throughout the value chains. Data availability and data quality is not sufficiently mature in many cases, why a push in this regard is needed to enable reliable and robust data on product level.**

**About EuroWindoor AISBL** – EuroWindoor AISBL was founded as an international non-profit Association, in order to represent the interests of the European window, door and facade (curtain walling) sector. Our 20 national associations speak for European window, door and facade manufacturers that are in direct contact with consumers, and thereby having large insights on consumers' demands and expectations. We are at the forefront interacting with dealers, installers and consumers buying windows and doors, and the companies behind the associations cover selling all over Europe.
